Subject: WAIS

I can provide you with the UNIX software we have made available since June 10 1991. We have a few releases we provided before that that will take some time to track down and restore from tape.

I've placed the following files on ~jonathan/wais/old-releases in Cambridge:

-r--r--r--	1	brewster	463981	Jun 10	1991	wais-8-b1.tar.Z
-rw-rw-r--	1	jonathan	487029	Jul 19	1991	wais-8-b2.tar.Z
-rw-rw-rw-	1	brewster	564840	Sep 23	1991	wais-8-b3.tar.Z
-rw-rw-rw-	1	morris	701183	Apr 7	1992	wais-8-b4.1.tar.Z
-rw-r--r--	1	jonathan	694119	Feb 28	1992	wais-8-b4.tar.Z

In addition you'll find wais-8-b5.tar.Z in ~ftp/wais, Where you'll find all the documentation we provide outside the releases.

All of this software is in UNIX compressed tar format. You can unpack them using the command:

```
% zcat wais-8-[version].tar.Z | tar xvf -
```

You'll get a directory called wais-8-[version] for each one.

We have also released a couple of Macintosh versions of the software. The most recent is in ~ftp/wais in Cambridge. There is both a compiled version (with some documentation) and the source. I believe both are in a special Macintosh archive format. For older versions you'll have to ask Harry and Brewster.
